RE: SUPPORT ASSEMBLY BILL 283

On behalf of the AWARE Coalition representing over 50 different state-wide groups supporting legislation to reduce drunk driving and underage drinking and increase alcohol treatment and prevention programs, we support Representative Tony Staskunas's comprehensive drunk driving legislation, Assembly Bill 283.

AB 283 begins to solve the high rate of drinking and driving in Wisconsin and bringing some of our penalties more in line with other states and enacting Ignition Interlock Devices requirements.

We believe this is a constructive start but more needs to be done, especially to reduce the staggering statistic from WI DOT stating that **nearly two thirds of the fatal or serious injury crashes involving alcohol were caused by those never before arrested for operating while intoxicated.** National research indicates that the main deterrent to people driving drunk is the fear of being caught. AWARE believes more could be done in this area.

AWARE would respectfully request an amendment to this comprehensive bill that would prohibit insurance companies from denying claims for accident victims who test positive for alcohol or other drugs. If an insurance company denies a claim due to a person drinking, a health care providers still renders the care and ultimately we all pay for this through higher premiums. An increasing number of states prohibit insurance companies from denying claims.

We look forward to working with you on this legislation and would be happy to provide additional information. Thank you.
