Residency Program:
Duration/Type: 12 month PGY2 Transplant Specialty Residency
Number of Positions: 1
Application Deadline: January 15
Starting Date: July 1
Estimated Stipend: $39,000
Interview Required: Yes

Special Features: The primary focus of the residency is abdominal transplant (kidney, liver, pancreas) of adult patients, with some pediatric and cardiothoracic (heart and lung) transplant experience available. The resident may choose to add an emphasis in nephrology. Comprehensive clinical knowledge and medication use management skills in the care of transplant recipients will be gained via practice as a member of the surgical and medical transplant teams, participating in multidisciplinary rounds, patient education, and ambulatory care clinics, and completion of a project suitable for publication. Rotations are tailored to meet the needs and interest of the resident.

Fringe Benefits: Health insurance, 14 vacation days/holidays, travel days to visit other institutions, 5 days sick leave, 3 interview days and funding for professional meetings.

Special Requirements for Acceptance: Onsite interview, PharmD Degree, prior pharmacy practice residency, achievement of licensure in Wisconsin no later than September 1, 2011.
Training Site:

Type: Hospital/Health System
Owner/Affiliate: Public Authority
Model Type(s): Teaching, Tertiary
Patient volume: 136,000 inpatient days; 43,000 emergency room visits; 566,000 outpatient visits
Tax Status: Nonprofit
Professional Staff FTE: 143
Non-Professional Staff FTE: 220
Total Beds: 493
Average Daily Census: 360
Other statistics: 6 intensive care units with the following bed distributions: 24 Medical/Surgical ICU, 24 Pediatric ICU, 7 Medical Cardiac ICU, 8 Cardiothoracic Surgery ICU, 7 Burn ICU, 16 Neurology/Neurosurgery ICU; 25,000 inpatient admissions; 18 bed Psychiatric Unit; 85 outpatient clinics; 550 house staff (physician residents/fellows)

Special Features: Ranked among the top 10 academic health centers nationwide in a University HealthSystem Consortium benchmarking study of safety, mortality, clinical effectiveness and equity in delivery care. Named a “Top Ten Company” in the nation by Working Mother magazine. Recognized by Health Information Management Systems Society (HIMSS) as one of 38 hospitals in 7 health systems nationwide to attain Stage 7 (of 0 - 7) for electronic health record implementation. Recognized as one of the nation’s Most Wired and Most Wireless hospitals by Hospitals and Health Network magazine, July 2010. The department's drug distribution system is heavily supported using automation, using innovative robotic and point-of-care technology, which is supported by a fully integrated information system and network. Pharmacist involvement at every step of the medication use process provides high levels of safety and quality in the provision of patient care. The department manages 13 retail pharmacies, a home care company, hospital and long-term care consulting services, full PBM managed care services, a telepharmacy mail order service, and a hospice hospital. Visit our web site for more information and application materials: http://www.uwhealth.org/pharmacy.

Major Programs
Critical Care—Med Flight critical care air transport service, established April 1985; fully equipped emergency room; trauma center with Level One status for both adult and pediatric care; burn unit; pediatric intensive care unit; cardiac and medical intensive care units.

UW Carbone Cancer Center—one of 39 federally designated centers for cancer treatment and research.

American Family Children's Hospital—62-bed pediatric hospital adjacent to UW Hospital and Clinics, nationally known for treatment of children's lung diseases, cardiac surgery and other pediatric specialties.

Organ Transplant—one of the nation's largest programs, with patient outcomes consistently cited among the best in the nation. Recognized by US Department of Health and Human Services as organ procurement best practice site.

Heart and Vascular Care—offers a comprehensive program of prevention, expert diagnosis and treatment of full spectrum of heart-related diseases.

Stroke Center—offers one of the most comprehensive sets of stroke studies in the nation, including testing of multiple surgical interventions, advanced diagnostic imaging and medications and therapeutic interventions for acute stroke and its after-effects.
Program Statement of Purpose

Residents who successfully complete the University of Wisconsin Hospital and Clinics’ Transplant Specialty Residency Program will be able to provide integrated pharmaceutical care at a patient-specific level. This residency will provide residents with opportunities to conceptualize, integrate, and transform accumulated experiences and knowledge into skill, competence, and confidence in providing patient care to transplant patients. The residency will also provide opportunity to develop teaching, presentation and research skills.

Residents will acquire a philosophy of practice that includes:
- Pharmacists’ responsibility and accountability for pursuing optimal drug therapy outcomes in the provision of patient care to transplant recipients
- Education and training of other health professionals
- A program of self learning and continuing professional development
- A commitment to the profession

Accreditation

The University of Wisconsin Hospital and Clinics Transplant Specialty Residency with an Emphasis in Nephrology is pursuing accreditation by the American Society of Health-System Pharmacists.

Program Director

The residency program director is Kimberly Holdener, PharmD, Senior Clinical Pharmacist at UW Hospital and Clinics.

Qualifications

In order to recruit high-quality residents, every potential pharmacy resident candidate will be evaluated using defined criteria. Those meeting the criteria will be actively pursued, with the current transplant pharmacy resident acting as that individual's liaison to the University of Wisconsin and its pharmacy residency program. Although high academic achievements are important for success in this program, other experiences of professional practice are also taken into consideration, keeping in mind that a correlation between grades and professional practice does not always exist.

The Department of Pharmacy at UW Hospital and Clinics (UWHC) has established the following policy and procedural method for the selection of residents that assures a consistent methodology and prevents potential for a prejudiced selection of a candidate. All applications must be received by January 15th and will be screened according to the following criteria:

- Completion of a prior residency and/or equivalent practice experience
- Graduation from an accredited college of pharmacy
- Completed transplant residency application
- Curriculum vitae contains no deficits or cause for concern in the areas of written communication, pharmacy experience, or academics
- Three recommendation letters and/or forms contain no deficits or cause for concern in the areas of personal relations/maturity/leadership, initiative/motivation, academics, pharmacy experience, or written/verbal communication
- Official transcripts must demonstrate a GPA ≥ 3.0 with no cause for concern in upper level pharmacy courses such as therapeutics, pharmacology, pharmacotherapy lab, etc.

Transplant Resident applicants will interview with the Program Director, Director of Pharmacy, the Manager of Acute Care, rotation preceptors, and the current resident in the program. This does not preclude input and suggestions from any other member of the staff. Other aspects considered are knowledge of professional practice, ability to communicate,
practical application of theoretical knowledge, interest in the program, and the ability to show leadership, confidence and maturity.

**Stipends & Benefits**

Residents during 2010-2011 will receive a stipend of $39,500/year. Pharmacy practice residents receive 14 paid vacation days/holidays and 5 sick days per year and are not required to use vacation time to attend meetings. As employees of University of Wisconsin Hospital and Clinics, residents receive full health insurance benefits and full access to the University of Wisconsin’s recreational, educational, and cultural facilities.

**Clinical / Resident Activities**

- Rounding as part of the transplant service
  - This will help the resident to gain an understanding of rational drug therapy and its application to patient care.
  - It will also help develop skills in working as an integral member of the multidisciplinary team
- Monitoring patients on the transplant unit
  - Understand the pathophysiology and medication implications of commonly encountered acute medical problems listed under areas of emphasis in the ASHP standards
  - Prevent, detect, manage and follow-up adverse drug reactions, drug interactions and patient safety issues in transplant patients
  - Apply pharmacokinetic and pharmacodynamic principles to the transplant patient and recommend serum drug concentration sampling to achieve cost-effect drug monitoring when applicable
- Answering medication-related questions from physicians, nurses, other health care professionals, patients and families
- Understand the hospital’s policies and procedures and adhere to them during patient care
- Help develop protocols and guidelines for drug administration in transplant, renal and dialysis patients in cooperation with the medical and nursing staff
- Performing patient care activities in the ambulatory care clinics
- Participate in an interdisciplinary and multidisciplinary committees (e.g. pharmacokinetics, transplant morbidity and mortality)
- Weekly resident lunch sessions – meetings with program directors, director of pharmacy, speakers discussing clinical and administrative topics
- Participation in resident group service projects

**Education**

- Develop an understanding of the references important to practice in the transplant setting
- Participate in interdisciplinary continuing education activities including grand rounds, research seminars, clinical conference and inservices
• Participate in journal clubs
• Evaluate new and existing medications for use in the transplant and nephrology setting and take part in the formulary review process, including identifying significant drug entities that will be approved and affect transplant and nephrology practice
• Participate in the Teaching Certification Class at the University of Wisconsin School of Pharmacy
• Attend a pharmacy (ASHP or ACCP) and/or transplant (American Transplant Congress) national meeting
• Present at the spring Pharmacy Society of Wisconsin Educational Conference
• Present at the Great Lakes Residency Conference
• Resident will be encouraged to join the Pharmacy Society of Wisconsin

Teaching
• Serve as a co-preceptor for pharmacy practice residents, junior administrative residents and PharmD students during their transplant elective rotations
• Present formal and informal lectures on transplant and nephrology therapeutic topics to pharmacists, physicians, nurses, students and other health care professionals.
• Participate in teaching pharmacotherapy lab

Research / Project
A research project is required. Identify areas of research involving the use of drugs, drug delivery devices, or drug monitoring in transplant patients. This will allow application of the scientific method and to provide experience in conducting clinical research. The resident will also participate in ongoing transplant research at UWHC.

Staffing
Residents are required to staff on the transplant unit every other weekend.

Clinical Pharmacy Faculty (UWHC/ SOP)

Jennifer Grice  (Clinical Pharmacist) received her Pharm. D. degree from Drake University. She completed a pharmacy practice residency at Gundersen Lutheran Medical Center in LaCrosse, WI. She is Board Certified in Pharmacotherapy. Her responsibilities include providing care for heart and lung transplant patients in the acute setting, as well as, cardiac patients in the ambulatory setting. She currently serves as preceptor for University of Wisconsin School of pharmacy and as the primary PGY-2 residents rotating on the cardiac team. Her main interests include heart failure, ventricular assist device support and transplantation.

David Hager  (Clinical Pharmacist) received his PharmD degree from the University of Wisconsin School of Pharmacy. He completed a pharmacy practice residency at the University of Wisconsin Hospital and Clinics. His responsibilities include advancing pharmacy practice within the Transplant Clinic, serving as the primary preceptor for PGY-1 residents interested in the abdominal transplant rotation, and providing care for liver, kidney, and pancreas transplant recipients. He also is a member of the surgical nutrition support team and is a Certified Nutrition Support Clinician. His main interests are in immunology, immunosuppression and therapeutic drug monitoring.

Mary S. Hayney  (Professor of Pharmacy at the University of Wisconsin – Madison (CHS)). Dr. Hayney received a bachelor and doctorate in pharmacy degrees from the University of Minnesota and Master of Public Health from the University of Wisconsin School of Medicine and Public Health. She did a postdoctoral fellowship in Clinical Pharmacology and Vaccine Research at the Mayo Clinic and Foundation in Rochester, MN. She joined the faculty at the University of Wisconsin School of Pharmacy in 1997. Her clinical practice is with the lung transplant program at the University of Wisconsin Hospital and Clinics. In addition to seeing patients in clinic, she assists with medication protocol development and has conducted several clinical research studies with this patient population. Her research interests lie in host response to vaccination with emphasis on immunization of solid organ transplant patients. Dr. Hayney is primary author on several papers. Her teaching responsibilities include immunology pharmacotherapy for pharmacy students.

Kimberly E. Holdener  (Senior Clinical Pharmacist) received her PharmD degree from the Purdue University College of Pharmacy. She completed a pharmacy practice residency at Barnes-Jewish Hospital in St. Louis, Missouri and a specialty residency in nephrology and kidney transplant at Hennepin County Medical Center in Minneapolis, Minnesota. Her responsibilities include
providing care for liver, kidney and pancreas transplant patients in the acute care and ambulatory settings and chronic kidney disease patients in the ambulatory setting. Her interests include transplant pharmacy practice, drug dosing and anemia therapy in patients with kidney disease, and the care of dialysis patients. She is also interested in expanding the role of pharmacists in the care of CKD patients.

Mar**garet R. Jorgenson** (Clinical Pharmacist) received her PharmD degree from the University of Michigan College of Pharmacy in Ann Arbor, MI. She completed her PGY1 pharmacy practice residency at Massachusetts General Hospital in Boston, MA and a PGY2 specialty residency in infectious diseases at the University of Michigan Hospital and Health System. She is also BCPS certified. Her responsibilities include providing clinical pharmacy services for kidney and pancreas transplant patients in the acute and ambulatory care settings. Her interests include transplant pharmacy practice, especially transplant infectious diseases and transplant immunology.

Julie** Pawola** (Senior Clinical Pharmacist) received her PharmD degree from the University of Illinois College of Pharmacy and completed a pharmacy practice residency at the University of Iowa Hospitals and Clinics. Her responsibilities include providing care for solid organ transplant recipients in the acute care setting and working in the outpatient transplant clinic. Her interests include medication education for transplant patients, drug dosing in patients with hepatic and renal insufficiency and expanded the role of pharmacists in the transplant clinic.

Warren Rose (Assistant Professor) earned his Pharm.D. from Butler University then completed a PGY-1 residency in pharmacy practice with Rush University Medical Center in Chicago, Illinois. Following residency training, he then completed a post-doctoral fellowship in infectious disease pharmacotherapy at the Anti-Infective Research Laboratory at Wayne State University. Dr. Rose’s research interests involve the impact of bacterial cell-to-cell communication in S.aureus on antimicrobial resistance, virulence and toxin production, and bacterial biofilms. His laboratory incorporates multiple in vitro modeling systems to evaluate these characteristics against both clinically available and investigation antimicrobials. These studies are used to evaluate optimal antibiotic activity, antibiotic penetration into simulated infections, and the development of antibiotic resistance. These systems can be used as tools for further study of optimal dosing regimens. In addition to the study of these strains in the laboratory, he is also involved in epidemiological studies of MRSA infections at the University of Wisconsin Hospital and Clinics.

Brianne Schmoller (Clinical Pharmacist) received her PharmD degree from the University of Wisconsin, School of Pharmacy. She is responsible for coordinating the pharmaceutical care of patients at the UW Mail Service Pharmacy. This pharmacy services a wide variety of patient populations that include general care, transplant, infectious disease, cystic fibrosis, and those receiving specialty injectable medications. Interests include expanding the role of pharmacists in the ambulatory practice setting and maintaining a clinical presence in a mail service pharmacy.

Aimee Sundberg (Director of Clinical Research) received her BS-Pharmacy and PharmD from the University of Wisconsin School of Pharmacy. She completed a pharmacy practice residency and an ASHP-accredited specialty residency in Solid Organ Transplantation at the University of Utah Hospitals and Clinics. Her role is to provide oversight of clinical trials performed in the Division of Transplantation. She also provides consultation to investigators for design and implementation of investigator-initiated protocols. Her interests include early phase development studies of new immunosuppressive agents with novel mechanisms of action.
Madison, Wisconsin

Madison is a thriving city of 250,000 situated in south central Wisconsin. It combines the friendly atmosphere of a university town with the appeal of a big city, including sporting events, art festivals, farmers’ markets, and cultural activities. Madison is only a short distance from lakes, parks, state and national forests, and larger cities such as Chicago and Milwaukee. Publications such as USA Today, Money Magazine, Outside, and U.S. News and World Report have rated Madison as one of the finest cities in the country in which to live and work.

The University of Wisconsin-Madison, with 45,000 students, is one of the largest and most diverse universities in the country. The campus is situated on the shores of Lake Mendota, within walking distance of the State Capital. There are 26 libraries throughout the campus. The Wisconsin Badgers, of the Big Ten Conference, offer major-college football, basketball, volleyball, hockey, crew, and many other sports.

There are 13 beaches and over 150 parks throughout the city. Some of the more popular city attractions include the Henry Vilas Zoo, Olbrich Botanical Gardens, and the UW-Madison Arboretum, with 1200 acres of natural forests, prairies and orchards. There are four lakes, with over 18,000 acres of lake surface for sailing, swimming, fishing, and water skiing. Many major streets have bike lanes to accommodate citizens and students who ride bicycles. On Saturdays in spring through fall, the Farmers’ Market takes place on the sidewalks surrounding the capital. With hundreds of vendors, it is one of the largest such markets in the country.

There are several museums and playhouses throughout the Madison area, including the Elvehjem Art Museum, Madison Children's Museum, Museum of Natural History, Madison Art Center, Overture Center, and the Isthmus Playhouse. The Memorial Union, on the UW-Madison campus, plays host to various events as well. The Alliant Energy Center plays host to fairs, sporting events, and concerts year round. The Monona Terrace, a Frank Lloyd Wright design overlooking Lake Monona, is a 250,000 square foot meeting facility. The annual Art Fair on the Square draws over 100,000 visitors each year. Seasonal events include the annual Art Fair on the Square, The Taste of Madison, and Rhythm and Booms which draws over over 100,000 visitors per event.

Madison is within driving distance of many attractions. An hour's drive north is the famous Wisconsin Dells recreation area and the Circus World Museum in Baraboo. To the northeast is Green Bay, home of the Green Bay Packers football team, and Door County, with its old-style charm and bed-and-breakfast inns. One hour to the east on I-94 is Milwaukee, home of Miller Brewing Company and the Brewers baseball club and Bucks basketball. Chicago is only 2½ hours southeast on I-90, and Minneapolis-St. Paul is 4 hours west on I-94.

How Do I Apply?

In order to be considered for the Transplant Specialty Residency at UW Hospital and Clinics, you must:

1. Have completed a pharmacy practice residency by July 1, 2011

2. Be enrolled in enrolled in the American Society of Health System Pharmacists Residency Matching Program. Applications may be downloaded from the ASHP website (www.ashp.org). The deadline for match registration is usually in mid-January.

3. Complete an online application:
   a. Go to our website at www.uwhealth.org/careers
   b. Search for jobs at University of Wisconsin Hospital and Clinics UWHC
   c. Apply for job ID
   d. The online application includes/requires a behavioral assessment. Your online application will be rejected if you do not fully complete this assessment. Take your time to read each question carefully and answer as accurately as possible

4. Submit an application packet by January 15th containing the following:
   - Letter of intent. Include the following in your letter:
     • Why do you want to complete a Transplant Specialty?
     • Why do you want to complete a Transplant Residency at UW Hospital and Clinics?
   - UWHC Transplant Residency Application (attached)
   - Curriculum Vitae

Mail application packets to:

   Jenny Lendborg
   University of Wisconsin Hospital and Clinics
   600 Highland Avenue
   F6/133 CSC, Mail Stop 1530
   Madison, WI 53792

5. The three persons you select as references should mail their recommendation forms (attached) directly to Jenny Lendborg at the address listed above.

6. Request a copy of your official pharmacy school transcripts; have them sent directly to Jenny Lendborg at the address listed above.

7. Once your complete application packet is received, you will be contacted by the department secretary to set up an interview. You may also contact the Transplant Residency Director, Kim Holdener, at (608) 263-1290 or kholdener@uwhealth.org with any questions about the interview or the program.

Applicants to the residency program specified above are required to have recommendations submitted by persons who are in a position to evaluate their qualifications for residency training. The recommender is asked to make a frank appraisal of the applicant's character, personality, abilities and suitability for a pharmacy residency. All comments and information provided will be kept in strictest confidence.

For the recommender to complete:
I have known the applicant for approximately _____ (months) (years). My relationship to the applicant was (or is) in the following capacity:

☐ faculty advisor  ☐ employer
☐ clerkship preceptor  ☐ supervisor
☐ other faculty relationship  ☐ other (please specify) ________________________________

I know him/her  ☐ very well  ☐ fairly well  ☐ only casually

Does the applicant possess any special assets that should be noted?

Does the applicant demonstrate any weakness that you feel would hinder his/her ability to perform effectively in a residency program?

To the recommender:
Please complete this form by January 15th and return to:

Jenny Lendborg
University of Wisconsin Hospital and Clinics Department of Pharmacy
600 Highland Avenue
F6/133 CSC, Mail Stop 1530
Madison, WI  53792
Fax: (608) 263-9424  E-mail: jlendborg@uwhealth.org

Applicants to the residency program specified above are required to have recommendations submitted by persons who are in a position to evaluate their qualifications for residency training. The recommender is asked to make a frank appraisal of the applicant's character, personality, abilities and suitability for a pharmacy residency. All comments and information provided will be kept in strictest confidence.

For the recommender to complete:
I have known the applicant for approximately _____ (months) (years). My relationship to the applicant was (or is) in the following capacity:

☐ faculty advisor       ☐ employer
☐ clerkship preceptor   ☐ supervisor
☐ other faculty relationship ☐ other (please specify) ________________________________

I know him/her   ☐ very well       ☐ fairly well       ☐ only casually

Does the applicant possess any special assets that should be noted?

Does the applicant demonstrate any weakness that you feel would hinder his/her ability to perform effectively in a residency program?

Other Comments:

(over)
Relative to persons of similar background, training and professional interests, how would you rate this applicant for each of the following characteristics? Please place an X under the rating column which best described the applicant.
