

UW HEALTH JOB DESCRIPTION

PHLEBOTOMIST FLOAT

Job Code: 530012	FLSA Status: Non-Exempt	Mgt. Approval: M Marggi	Date: August 2023
Department: Laboratory Services		HR Approval: S. Whitlock	Date: August 2023

JOB SUMMARY

UW Health Clinical Laboratory is a comprehensive provider of laboratory testing, expert medical interpretation of specimens and innovation in laboratory technology. The laboratory plays an essential role in the quality and safety of patient care by providing accurate diagnostic and treatment information to caregivers and patients. Services are provided for inpatients and/or outpatients at the University Hospital, American Family Children's Hospital, affiliated Satellite laboratories or other off-site locations where UW Health provides service.

The UW Health Phlebotomist works under the general supervision of their manager or supervisor and may assist in the training of students and less senior staff. Student teaching may include nurses, medical assistants, medical technologists, medical laboratory technicians and students in these disciplines. Under supervision, the Phlebotomist completes competency-based training checklists to maintain The Joint Commission, College of American Pathologists and Clinical Laboratory Improvement Amendments compliance. The incumbent may teach advanced skills while maintaining efficient and friendly customer service. Unusual circumstances or problems are referred to more senior staff.

Phlebotomy duties may include:

- Standardized and specialized phlebotomy procedures on patients of all ages
- Proper patient identification and specimen labeling
- Proper use of isolation precautions
- Specimen receiving and specimen processing
- Patient check-in and order entry of laboratory tests in the laboratory information system
- Disposal of blood drawing equipment according to health and safety regulations
- Limited waived testing (ex. Rapid strep, urine dip testing, urine prep) that requires minimal interpretation and judgment

The incumbent will always maintain patient confidentiality and will ensure the comfort and safety of patients and students. The incumbent will communicate patient problems to the clinical staff including clarification of orders and patient status. The incumbent will work closely with management or lead staff to resolve problems.

Organizational skill and ability to prioritize testing requests are essential to successful performance. Attention to detail and reliability are required to ensure proper collection of specimens to be used in the timely diagnosis and treatment of patients. Good communication skills are required during interaction with clinical staff and physicians.

MAJOR RESPONSIBILITIES

A. Responsible for collection of blood and other specimens following approved procedures.

- Select appropriate site for venipuncture (arm, hand, leg, ankle or foot), assemble equipment and collect specimen(s) using correct order of draw and according to policy and procedure.
- Use proper cleansing and aseptic technique to collect blood cultures.
- Collect capillary specimens via skin puncture of finger, big toe or heel into capillary tube or Microtainer.
- Always verify pediatric orders and minimum blood volumes prior to collection from pediatric patient.
- Consult with nursing staff prior to pediatric collection on all Inpatient units. Utilize pain abatement or distraction techniques. If available, use Child Life services appropriately when working in the Outpatient setting.
- Collect specimen(s) requiring special techniques including research kits, syringe collection, tolerance tests and urea breath test.
- Perform emergency first aid as necessary.
- Recognize the need for patient medical assistance and call for the correct Response Team to properly assess and care for the patient.

B. Responsibilities for Laboratory testing services.

- Complete all required aspects of patient registration.
- Ensure test request complies with laboratory policy and proper documentation is provided.
- Enter or release patient test orders using the laboratory information system.
- Supply patients with proper collection supplies (ex., 24-hour urine containers and occult blood collection kits).
- Ensure proper patient identification and correct test order upon receipt of specimens.
- Perform laboratory testing on patient specimens using manual kits and automated technology. Maintain sample identification through all steps of the testing process.
- Report results to ordering source using laboratory computer and/or telephone. Call and document critical results as specified by laboratory policy.
- Perform and document routine instrument maintenance on select laboratory equipment.
- Perform and document required quality control activities, such as internal and external controls, patient sample comparisons, and proficiency testing.
- Recommend process improvements.

UW HEALTH JOB DESCRIPTION

- Communicate supply needs to lead worker or manager.
- Attend appropriate meetings as assigned.
- Participate in continuing education.
- Perform additional duties as assigned.

C. Training and Competency Testing Responsibilities

- Participate in the teaching of venipuncture to students and new employees.
- Provide assistance with teaching blood collection procedures using training checklists provided.
- Provide training support for other employees as needed.

ALL DUTIES AND REQUIREMENTS MUST BE PERFORMED CONSISTENT WITH THE UW HEALTH PERFORMANCE STANDARDS.
