JOB SUMMARY

The Clinical Pharmacist is responsible for providing medication therapy management services in collaboration with other providers to assure that drug therapy is safe, effective, efficient and cost-effective. Pharmacy services provided include interdisciplinary patient care rounds, medication reconciliation, medication therapy monitoring, medication orders management, patient education, drug information, drug dosing, and various scholarly activities. The Pharmacist performs both clinical and distributive tasks necessary to ensure that patients' medication therapy is safe, effective, timely and efficient. The Pharmacist will provide training and education to Pharmacy Residents and PharmD students through practical and didactic experiences. Incumbent acts independently within the scope of their license and areas of expertise with the help of general policies, procedures and practice guidelines with support from the Pharmacy Manager. The pharmacist ensures that patient care is maintained through compliance with the department's policies, rules and regulations promulgated by the Board of Pharmacy, and other applicable regulatory bodies.

MAJOR RESPONSIBILITIES

1. Patient care services
 - a. Interdisciplinary patient care rounds
 - i. Participates in rounds when scheduled in their care area
 - ii. Oversees Pharmacy Resident and PharmD student participation on rounds
 - iii. Works collaboratively with the interdisciplinary team to maximize individual patient outcomes
 - b. Performs and documents medication reconciliation, comparing prescriber's orders to the patient's active medication list(s) and working with prescribers to make changes to orders as necessary
 - i. Interviews patients upon admission and reconciles medication history against inpatient medication admission orders
 - ii. Upon transfer, reconciles the inpatient medication profile with medication transfer orders
 - iii. Reconciles discharge medication orders with inpatient pharmacy profile and admission medication history and performs discharge counseling
 - iv. Provides updated medication list to the patient upon discharge
 - v. Documents these activities in the medical record
 - c. Medication therapy monitoring
 - i. Ensures that drug regimen is consistent with all UWHC medication use guidelines and policies (or other evidence-based guidelines in the absence of UWHC-specific guidelines) which includes but is not limited to: antimicrobial use guidelines, intravenous to oral renal dosing, and serum drug concentration protocols
 - ii. Adjusts regimens based on approved protocols and consultation with the interdisciplinary team
 - iii. Completion of a daily profile review for each patient consisting of the following elements:
 - iv. Age, sex, height, weight, and renal/hepatic function
 - v. Pregnancy and lactation status
 - vi. Appropriateness of the dose, route, rate, timing and frequency of administration, indication, and therapeutic duplication of all medications
 - vii. Available laboratory values and microbiology results
 - viii. Appropriateness of antimicrobial therapy regimens which may include anticipated/planned stopped dates
 - ix. Potential drug-drug, disease-drug, food-drug interactions or contraindications
