The gynecology team at University Hospital provides a full range of specialty gynecological care. We offer the latest diagnostic and treatment options including the newest procedures shown through research to be safe and effective.

In addition to traditional medical and surgical services, we also offer minimally-invasive procedures including same-day surgeries. We are one of only a few providers in Wisconsin performing full laparoscopic excision of endometriosis including bowel, bladder and ureteral involvement.

The Gynecology Clinic at University Hospital handles over 4,000 patient visits each year. This breadth of experience is just one of the reasons UW Health gynecology was ranked #13 nationally by U.S. News & World Report’s “Best Hospitals Guide.”
