Dr. Juan Jaume and Dr. Rebecca Sippel will provide a multidisciplinary thyroid clinic on the fourth Monday afternoon of every month. Dr. Jaume and Sippel will use a multidisciplinary approach to allow patients to see both providers and complete their evaluation with one visit. They will see patients with:

- Thyroid Cancer
- Graves Disease
- Adrenal Masses
- Hyperparathyroidism
- Hyperthyroidism
- Thyroid Nodules

Dr. Jaume and Sippel will also see endocrine tumor patients for treatment of problems with the thyroid, parathyroid, or adrenal gland.

Dr. Jaume specializes in the diagnosis and treatment of endocrine diseases in general, with particular interest in endocrine autoimmunity (mainly thyroid diseases and diabetes) and thyroid cancer. He directs the Thyroid Multidisciplinary Clinic, which addresses all diseases of the thyroid and parathyroid including cancer.

Dr. Sippel specializes in surgical treatment of the thyroid, parathyroid, and adrenal glands. She is an expert in parathyroid surgery and offers the latest in minimally invasive approaches for the treatment of hyperparathyroidism (minimally invasive parathyroidectomy, minimally invasive radio-guided parathyroidectomy). Dr. Sippel is also dedicated to the treatment of both benign and malignant diseases of the thyroid.
