Madison, WI 53726

Learn about what's new and next...

The Saving Sight Sessions take place at the Health Sciences Learning Center (HSLC). Parking is available for a fee in the adjacent UW Hospital and Clinics (UWHC) patient parking ramp at 600 Highland Avenue. The HSLC is the white building to the north of the ramp. The UWHC parking ramp and the HSLC are shown in red on the map at left. Please enter through the HSLC Main Entrance.

Construction Alert: We are in the midst of several major construction projects to improve access and offer an even safer, more comfortable environment. Construction will impact Highland Avenue, the road that loops around the hospital and parking ramp. Please expect delays, add travel time and use caution.

Your privacy is our top priority. If you do not wish to receive communications from us, please send an email with your name and address to uwhealthptout@uwhealth.org or call us at (844) 300-2002. If you are a patient at UW Health, you will continue to receive information related to your care. Thank you.

Saving Sight

SESSIONS

What's new and next in eye care

Saving sight is the most important part of our mission. The Department of Ophthalmology and Visual Sciences at the UW School of Medicine and Public Health is devoted to preserving and protecting vision. This program is one more way to keep you informed.

The Saving Sight Sessions are a series of community education programs created to share discoveries and developments to stop blinding diseases, enhance treatment and improve vision-related quality of life.

Please join us as we share the ways we are transforming eye care.

Yao Liu, MD

As the child of first-generation immigrants who came in search of a better life, Dr. Yao Liu recognizes how fortunate we are to have such tremendous health resources in the United States. Yet, many Americans do not receive much-needed eye care due to lack of access. Dr. Liu's research focuses on expanding access to care through telemedicine, particularly for diabetic eye disease in Wisconsin's rural communities.

Dr. Liu's work proudly reflects the "Wisconsin Idea," where knowledge gained by researchers at the University of Wisconsin is applied to benefit the people of Wisconsin and beyond. Blindness from diabetes is preventable, but diabetic eye disease remains the leading cause of blindness largely due to low screening rates. Please join Dr. Liu as she explains how new screening technologies can help prevent vision loss in the United States and around the world.

We are excited to share this pioneering research and how it benefits people's lives. We look forward to seeing you at our Saving Sight Session on April 21.

TELEMEDICINE

Telemedicine: Saving Sight at Home and Around the World

**APRIL 21, 2016
6–7 pm**

Health Sciences Learning Center, Room 1325
750 Highland Ave., Madison, WI

Parking is available in the adjacent UW Hospital and Clinics patient parking ramp (see map and parking information on back).

Please RSVP by April 15, 2016
