

Preventive care reminders in MyChart

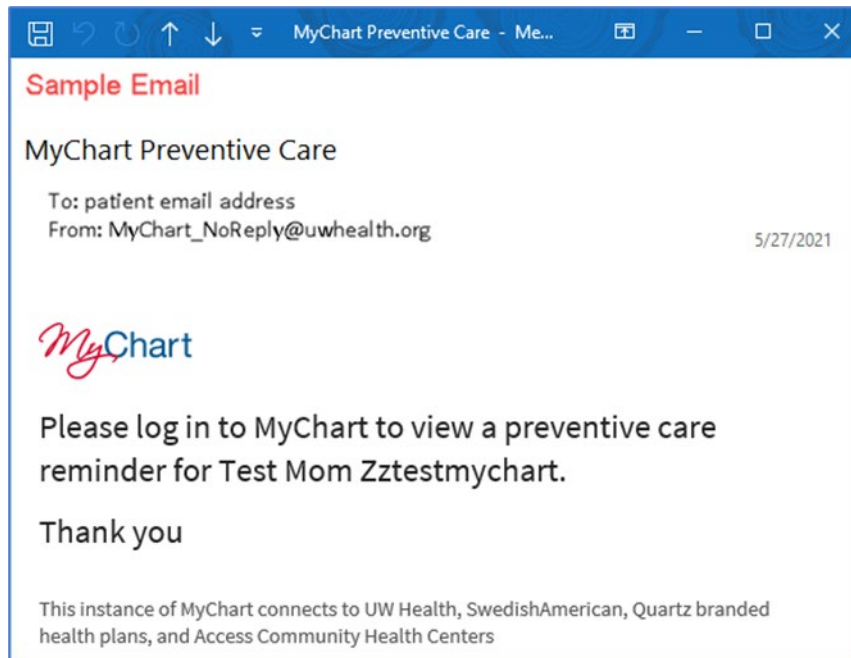

To stay healthy and watch for early signs of health issues, it's very important to get your health screenings. When you use MyChart you can find out which screenings are due and what preventive care is recommended.

*My*Chart

UWHealth

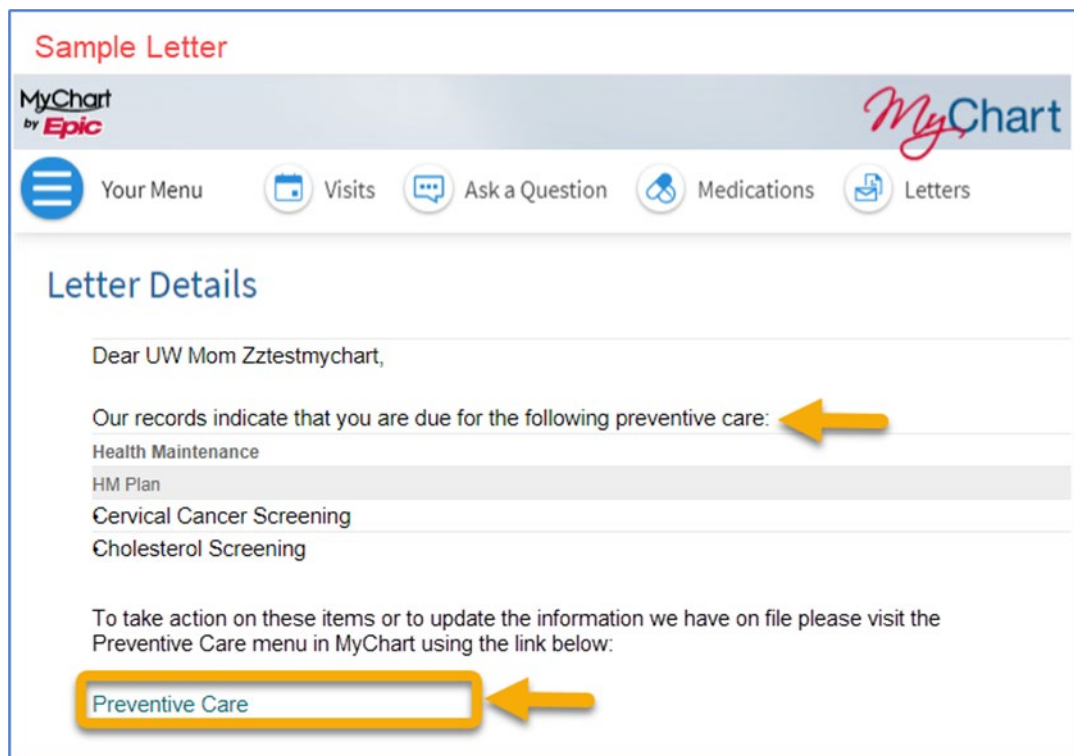

Email reminder

When you are due for preventive care, you will receive an email or notification on your smart device.

Letter

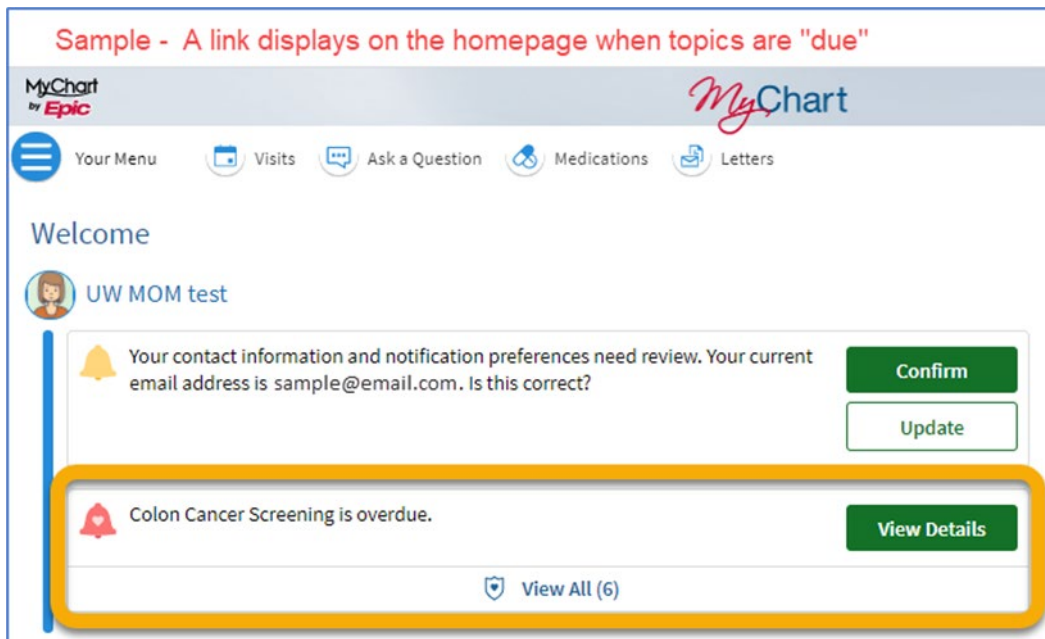

Once logged into MyChart, you will see a link to open a letter. The letter explains what is due.

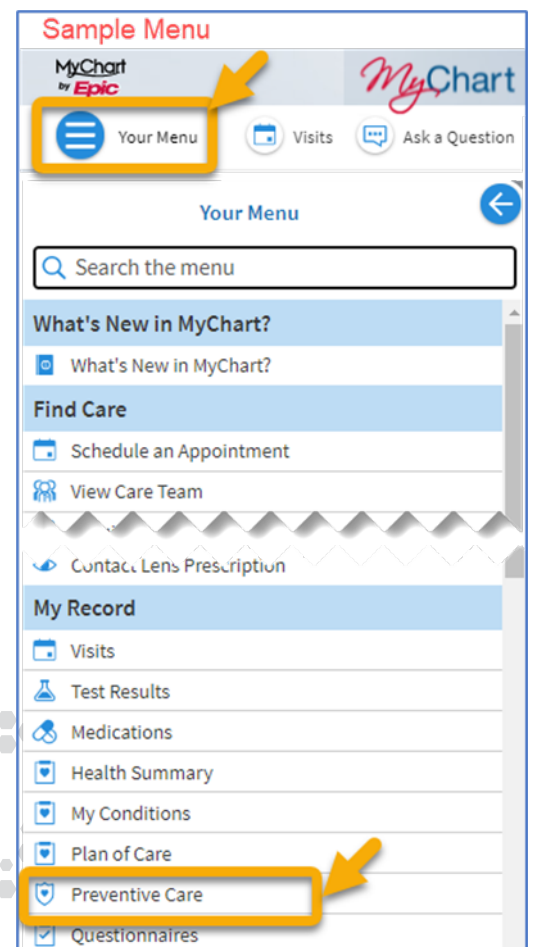

Preventive Care Page

View more information about screenings on the [Preventive Care Page](#). Find this page by clicking the link in the letter (shown on previous page) or by using the options below:

- Click the link on the homepage when topics are “due.” (If none are due, this view won’t be shown.)

- Open the Menu and select Preventive Care

Preventive Care Page

The Preventive Care Page shows screenings that are due or have been done. This is based on your records in the UW Health system. If MyChart shows that care is due and you received it elsewhere, ask your provider to update your information at your next visit.

Preventive Care

Health screenings and early detection are critical steps in disease prevention. The following recommendations are for people of your age, sex, and medical history. MyChart may not show all recommendations. Talk to your doctor about the procedures that are right for you. Click the "Learn More" link(s) for more information.

If you have received this care somewhere else, please let your clinic staff know at your next primary care visit. Your clinic will work with you to review and update the screenings that are recommended for you. Once your medical record is updated those updates will appear in MyChart.
