All medical and faculty directors are able to provide consultation regarding the ordering of appropriate tests and the medical significance of laboratory data.

## Autopsy

Telephone: 608.890.7075 (8:00 am – 5:00 pm)

After hours, contact the pathology resident on call (608.262.2122) or use Web paging for the Pathology Surgical Resident for the appropriate date and time.

## Bone Marrow Laboratory

The UWH Bone Marrow Laboratory provides technical assistance for the collection of bone marrow biopsies and provides support services for Hematopathology.

Services include:

- Bone Marrow, Body Fluid, and Peripheral Blood Cell differentials
- Cytochemical stains used to aid in the diagnosis of hematological diseases
- Urine Hemosiderin testing

Technical assistance for bone marrow biopsy collections are by appointment only, Monday through Friday, 8:00 am – 4:30 pm.

Telephone: 608.263.8044

Fax: 608.263.0910

## Flow Cytometry Laboratory

The UWH Flow Cytometry Laboratory performs flow cytometric analysis used by clinicians in diagnosing, monitoring, and treating patients with the following disorders: acute and chronic leukemia, lymphoproliferative disease, multiple myeloma, immune deficiencies, multiple sclerosis, and paroxysmal nocturnal hemoglobinuria. Services include:

- Acute and chronic leukemia immunophenotyping
- Lymphoproliferative disorder immunophenotyping
- Multiple Myeloma Immunophenotyping
- Paroxysmal Nocturnal Hemoglobinuria testing
- T-cell and T-subset quantitation
- CD3 and CD20 quantitation
- CD34 (Stem Cell) quantitation
- T-cell, B-cell, NK-cell quantitation

Telephone: 608.263.3868  
Fax: 608.263.0910

## HLA Laboratory

The UWH Histocompatibility (HLA) Laboratory provides HLA-related compatibility testing for solid organ transplants, bone marrow transplants, platelet transfusions, and HLA-associated diseases.

Services include:

- HLA low-resolution serological and low and high-resolution PCR-based typing for solid organ and stem cell transplantation
- Compatibility testing services for deceased organ donor recovery and allocation
- HLA typing for diseases association
- HLA typing/matching and antibody screening for platelet transfusion and non-hemolytic transfusion reactions

## Point of Care Testing

UWH Point of Care (POC) Testing refers to any patient testing performed within UWH that is not performed as part of the central laboratory. UWH Clinical Laboratory provide consultative services for laboratory services in all patient care areas.

Services provided by the POC Coordinators in the Clinical Laboratory include:

- Method validation of new instruments or test methods
- Assistance with procedure manual preparation
- Developing quality control and quality assurance programs
- Resolving quality control problems
- Meeting regulatory requirements

Requests for new point of care tests or the expansion or relocation of existing point of care tests must be approved by the Laboratory Testing Oversight Committee, in accordance with UWH Administrative Policy 8.40. Please contact a POC Coordinator for more information.

## Quality

The UWH Clinical Laboratory Quality Department:

- Supports efforts to achieve laboratory goals of continuous performance improvement and patient safety
- Supports implementation of a total quality management system in the laboratory and facilitates use of quality management tools and techniques
- Works with laboratory staff to strengthen their commitment to quality
- Supports development of quality indicators and the collection and analysis of data for monitoring and improvement activities
- Aggregates and trends information from incident and variance reporting
- Works with patient relations to resolve laboratory service issues

## Research/Study Protocols

As an academic medical center, the UWH is committed to advancing medical knowledge through research. Investigators at UW are involved in many projects including clinical studies to test the effectiveness and safety of new therapies and medical devices, as well as to expand scientific and medical knowledge.

The Clinical Laboratory provides laboratory testing for approved research and investigational purposes. Refer your questions to the Research Coordinator.

## Special Coagulation Laboratory

The UWH Special Coagulation Laboratory provides comprehensive diagnostic testing for bleeding and thrombotic disorders.

Services Include:

- Hypercoagulation testing
- Factor Activity & Inhibitor Assays
- vonWillebrand testing
- Platelet Assays
- Heparin Levels
- Heparin-Induced Platelet Antibody testing
