

University of Wisconsin Hospitals and Clinics Board of Directors
Review of Medical Staff – April 6, 2011

The Medical Board, upon the recommendation of the Credentials committee, recommends approval of the following new applications, additional privileges, biennial reappointments and status changes for the medical staff. All of the recommended actions have been reviewed in accordance with the Medical Staff Bylaws. The credentials of all new applicants have been verified. All persons listed below meet the standards of the medical staff for the membership and privileges recommended.

Credentials Committee: February 7, 2011

Medical Board: February 10, 2011

Nathan J. Rudin, M.D., Chair of Medical Board & Vice-
President of Medical Staff

New Applications

Gaurav Datta, MD, Active Staff

Department of Medicine/Hospitalist

- Internal Medicine/Major Care Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat adult patients with medical illnesses. These privileges also include care of patients via telemedicine. These privileges include, but are not limited to, lumbar puncture, thoracentesis, paracentesis, arterial line insertion, diagnostic or therapeutic joint aspiration/injection, endometrial biopsy, endocervical polyp removal/biopsy, intrauterine device (IUD) insertion, punch biopsy of the skin, percutaneous needle biopsy of a breast mass or skin lesion, soft tissue injection, liquid nitrogen cryosurgery of the skin or other appropriate lesion, and perform waived laboratory testing not requiring an instrument; including but not limited to fecal occult blood, urine dipstick, and vaginal PH by paper methods and supervision of residents, fellows, and others in training.
- Internal Medicine/Intermediate Care Core Privileges: Privileges to evaluate including performance of H&P, diagnose, consult, and treat adults patients with medical illnesses in the outpatient setting (General Internal Medicine clinic). Includes lumbar puncture, thoracentesis, paracentesis, diagnostic or therapeutic joint aspiration/injection, endometrial biopsy, endocervical polyp removal/biopsy, intrauterine device (IUD) insertion, punch biopsy of the skin, percutaneous needle biopsy of a breast mass or skin lesion, soft tissue injection, liquid nitrogen cryosurgery of the skin or other appropriate lesion, and supervision of residents, fellows, and others in training. These privileges also include care of patients via telemedicine.
- Central venous catheter insertion for access
- Adult Moderate Sedation-- Within CSC only

Andrea M. Dvorak, MD, Active Staff

Department of Pediatrics/General

- Pediatric Major Care Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult and provide care for infants, children and adolescents with complex problems or severe illnesses, including those that are potentially life-threatening. These privileges also include care of patients via telemedicine. These privileges include, but are not limited to, lumbar puncture; peripheral arterial puncture; peripheral venous puncture; neonatal circumcision; intubation; suprapubic bladder tap in the care of newborn infants greater than 2000 grams; and performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and vaginal PH by paper methods; and supervision of residents, fellows and others in training.

Sheryl L. Henderson, MD, PhD, Active Staff

Department of Pediatrics/Infectious Diseases

- Pediatric Infectious Disease Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat infants, children and adolescents with possible or documented infectious disease. These privileges include joint and lymph node aspiration, provision of immediate and longitudinal care for adults

with potential infectious diseases, especially those often seen in children; and supervision of residents, fellows and others in training.

Jonas J. Lee, MD, Active Staff
Department of Family Medicine

- Family Medicine Adult Core Privileges: Physicians granted these privileges shall be able to care for patients with more complicated medical problems. If a diagnosis cannot be established after reasonable investigation, or if there is a serious threat to a patient's life, consultation shall be obtained. Privileges to admit, evaluate including performance of H&P, diagnose, consult and provide treatment to adult patients with general medical problems. These privileges include, but are not limited to, suturing of uncomplicated lacerations; I&D of abscess; simple skin biopsy or excision; removal of nonpenetrating corneal foreign body; uncomplicated minor closed fractures (not involving traction or major manipulation); uncomplicated dislocations; lumbar punctures; diagnostic endometrial sampling; peripheral intravenous cannulation; peripheral arterial puncture; lumbar puncture; preoperative care of surgical patients; postoperative medical care of surgical patients; and performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and vaginal PH by paper methods; and supervision of residents, fellows, and other persons in training.
- Family Medicine Pediatric Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult and provide non-surgical treatment to pediatric patients without major complications or serious life threatening disease. These privileges include, but are not limited to, the care of normal newborn as well as the uncomplicated premature infant equal to or greater than 36 weeks gestation; and supervision of residents, fellows, and other persons in training.
- Circumcision

Tabraiz Mohammed, DO, Active Staff
Department of Medicine/General Internal Medicine

- Internal Medicine/Major Care Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat adult patients with medical illnesses. These privileges also include care of patients via telemedicine. These privileges include, but are not limited to, lumbar puncture, thoracentesis, paracentesis, arterial line insertion, diagnostic or therapeutic joint aspiration/injection, endometrial biopsy, endocervical polyp removal/biopsy, intrauterine device (IUD) insertion, punch biopsy of the skin, percutaneous needle biopsy of a breast mass or skin lesion, soft tissue injection, liquid nitrogen cryosurgery of the skin or other appropriate lesion, and perform waived laboratory testing not requiring an instrument; including but not limited to fecal occult blood, urine dipstick, and vaginal PH by paper methods and supervision of residents, fellows, and others in training.
- Central venous catheter insertion for access

Tod W. Speer, MD, Active Staff
Department of Human Oncology

- Radiation Oncology Core Privileges: Privileges to evaluate including performance of H&P, diagnose, consult, and treat patients of all ages, with malignant and benign tumors, as well as other conditions where radiotherapy has a role. These privileges include, but are not limited to, administration of external beam radiation therapy, brachytherapy, naked or tagged radioisotopes (including intralesional, intracavitary, intracystic, intravenous, intra-arterial or other routes of administration), radiosensitizers, radioprotectors and other therapeutic drugs required in the routine management of these patients; management and maintenance of indwelling brachytherapy catheters and other devices for delivery of brachytherapy or other forms of radiation; performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and vaginal PH by paper methods; and supervision of residents, fellows, and other persons in training.

Deborah A. Stec, PhD, Clinical Psychology
Department of Psychiatry

- Psychological testing: children (under 12)
- Psychological testing: adolescents
- Psychological testing: adults
- Individual psychotherapy: children (play)
- Individual psychotherapy: adolescents

- Individual psychotherapy: adult
- Behavior modification
- Couple therapy
- Family therapy
- Group therapy
- Psychoeducational counseling
- Psychoeducational testing
- Psychological consultation
