

**University of Wisconsin Hospitals and Clinics Board of Directors**  
**Review of Medical Staff –September 2, 2014**

The Medical Board, upon the recommendation of the Credentials committee, recommends approval of the following new applications, additional privileges, biennial reappointments and status changes for the medical staff and other providers requesting professional privileges for practice at UWHC. All of the recommended actions have been reviewed in accordance with the Medical Staff Bylaws. The credentials of all new applicants have been verified. All persons listed below meet the standards of the medical staff for the membership and privileges recommended.

Credentials Committee: July 7, 2014

Medical Board: August 14, 2014

Nathan Rudin, M.D., Chair of Medical Board & President of  
Medical Staff

The following actions were endorsed by the UWHC Credentials Committee and are recommended to the Medical Board for approval/action.

**New Applications**

**Alaa A. Abd-Elseyed, MD, Active Staff**

**Department of Anesthesiology/General**

- Pain Management Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat patients presenting with acute or chronic pain. These privileges include, but are not limited to, anesthetic nerve block; arthrocentesis; injection of neuromuscular block; neurolytic nerve block; botulism toxin injection; epidural steroid injections/selective nerve root block; facet joint injections/medial and lateral branch blocks; major joints blocks/steroid injection; radiofrequency neurolysis; sympathetic ganglion blocks; trigger point injection; soft tissue injection; and performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and pH by paper methods; and supervision of residents, fellows and others in training
- Intrathecal pain pump
- Spinal cord stimulation trial and implant
- Anesthesiology Core Privileges: Privileges to evaluate including performance of H&P, consult and administer anesthesia to patients for relief and prevention of pain during and following surgical, therapeutic and diagnostic procedures, including the monitoring and maintenance of normal physiology during the perioperative period and perform waived laboratory testing not requiring an instrument; including but not limited to fecal occult blood, urine dipstick, and pH by paper methods. Supervision of Anesthesiologist Assistants is included in these privileges. These privileges include supervision of residents, fellows, and other persons in training.

**Dustin P. Andresen, MD, Active Staff**

**Department of Medicine/Hospitalist**

- Internal Medicine/Major Care Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat adult patients with medical illnesses. These privileges also include care of patients via telemedicine. These privileges include, but are not limited to, lumbar puncture, thoracentesis, paracentesis, arterial line insertion, diagnostic or therapeutic joint aspiration/injection, endometrial biopsy, endocervical polyp removal/biopsy, intrauterine device (IUD) insertion, punch biopsy of the skin, percutaneous needle biopsy of a breast mass or skin lesion, soft tissue injection, liquid nitrogen cryosurgery of the skin or other appropriate lesion, and perform waived laboratory testing not requiring an instrument; including but not limited to fecal occult blood, urine dipstick, and pH by paper methods and supervision of residents, fellows, and others in training.

**Andrew M. Baschnagel, MD, Active Staff**

### **Department of Human Oncology**

- **Radiation Oncology Core Privileges:** Privileges to evaluate including performance of H&P, diagnose, consult, and treat patients of all ages, with malignant and benign tumors, as well as other conditions where radiotherapy has a role. These privileges include, but are not limited to, administration of external beam radiation therapy, brachytherapy, naked or tagged radioisotopes (including intralesional, intracavitary, intracystic, intravenous, intra-arterial or other routes of administration), radiosensitizers, radioprotectors and other therapeutic drugs required in the routine management of these patients; management and maintenance of indwelling brachytherapy catheters and other devices for delivery of brachytherapy or other forms of radiation; performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and pH by paper methods; and supervision of residents, fellows, and other persons in training.

### **James F. Conniff, MD, Active Staff**

#### **Department of Family Medicine/General**

- **Family Medicine Adult Core Privileges:** Physicians granted these privileges shall be able to care for patients with more complicated medical problems. If a diagnosis cannot be established after reasonable investigation, or if there is a serious threat to a patient's life, consultation shall be obtained. Privileges to admit, evaluate including performance of H&P, diagnose, consult and provide treatment to adult patients with general medical problems. These privileges include, but are not limited to, suturing of uncomplicated lacerations; arthrocentesis; I&D of abscess; simple skin biopsy or excision; removal of nonpenetrating corneal foreign body; uncomplicated minor closed fractures (not involving traction or major manipulation); uncomplicated dislocations; lumbar punctures; diagnostic endometrial sampling; peripheral intravenous cannulation; peripheral arterial puncture; lumbar puncture; preoperative care of surgical patients; postoperative medical care of surgical patients; and performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and pH by paper methods; and supervision of residents, fellows, and other persons in training.
- **Family Medicine Pediatric Core Privileges:** Privileges to admit, evaluate including performance of H&P, diagnose, consult and provide non-surgical treatment to pediatric patients without major complications or serious life threatening disease. These privileges include, but are not limited to, the care of normal newborn as well as the uncomplicated premature infant equal to or greater than 36 weeks gestation; and supervision of residents, fellows, and other persons in training.

### **Alain R. Elian, MD, Active Staff**

#### **Department of Surgery/General Surgery**

- **General Surgery Core Privileges:** Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat patients presenting with disorders, illnesses or injuries of the alimentary tract, the abdomen and its contents, breast, skin, soft tissue, head and neck, endocrine system and minor extremity surgery. These privileges include, but are not limited to, laparoscopic surgery, upper gastrointestinal endoscopy, colonoscopy, insertion and management of arterial catheter, insertion and management of chest tubes, insertion and management of central venous catheters, lumbar puncture, pericardiocentesis, tracheostomy, paracentesis, management of trauma, and complete care of critically ill patients with underlying surgical conditions; performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and pH by paper methods; and supervision of residents, fellows and others in training.
- Stereotactic breast biopsy
- Bariatric & other weight loss surgery
- Adult Moderate Sedation-- Inside and outside CSC

### **Melissa A. Gannage, MD, Active Staff**

#### **Department of Psychiatry/General**

- **Adult Psychiatry Core Privileges:** Privileges to evaluate including performance of H&P, diagnose, consult and treat patients, above the age of 15, who suffer from mental, behavioral, or emotional disorders. These privileges also include care of patients via telemedicine. These privileges include supervision of residents, fellows and others in training.

**Briana L. Jelenc, MD, Active Staff**

**Department of Medicine/General Internal Medicine**

- Internal Medicine/Major Care Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat adult patients with medical illnesses. These privileges also include care of patients via telemedicine. These privileges include, but are not limited to, lumbar puncture, thoracentesis, paracentesis, arterial line insertion, diagnostic or therapeutic joint aspiration/injection, endometrial biopsy, endocervical polyp removal/biopsy, intrauterine device (IUD) insertion, punch biopsy of the skin, percutaneous needle biopsy of a breast mass or skin lesion, soft tissue injection, liquid nitrogen cryosurgery of the skin or other appropriate lesion, and perform waived laboratory testing not requiring an instrument; including but not limited to fecal occult blood, urine dipstick, and pH by paper methods and supervision of residents, fellows, and others in training.
- Internal Medicine/Intermediate Care Core Privileges: Privileges to evaluate including performance of H&P, diagnose, consult, and treat adult patients with medical illnesses in the outpatient setting (General Internal Medicine clinic). Includes lumbar puncture, thoracentesis, paracentesis, diagnostic or therapeutic joint aspiration/injection, endometrial biopsy, endocervical polyp removal/biopsy, intrauterine device (IUD) insertion, punch biopsy of the skin, percutaneous needle biopsy of a breast mass or skin lesion, soft tissue injection, liquid nitrogen cryosurgery of the skin or other appropriate lesion, and supervision of residents, fellows, and others in training. These privileges also include care of patients via telemedicine.

**Elliot R. Lee, MD, Courtesy Staff**

**Department of Psychiatry/General**

- Adult Psychiatry Core Privileges: Privileges to evaluate including performance of H&P, diagnose, consult and treat patients, above the age of 15, who suffer from mental, behavioral, or emotional disorders. These privileges also include care of patients via telemedicine. These privileges include supervision of residents, fellows and others in training.

**Didier A. Mandelbrot, MD, Active Staff**

**Department of Medicine/Nephrology**

- Internal Medicine/Major Care Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat adult patients with medical illnesses. These privileges also include care of patients via telemedicine. These privileges include, but are not limited to, lumbar puncture, thoracentesis, paracentesis, arterial line insertion, diagnostic or therapeutic joint aspiration/injection, endometrial biopsy, endocervical polyp removal/biopsy, intrauterine device (IUD) insertion, punch biopsy of the skin, percutaneous needle biopsy of a breast mass or skin lesion, soft tissue injection, liquid nitrogen cryosurgery of the skin or other appropriate lesion, and perform waived laboratory testing not requiring an instrument; including but not limited to fecal occult blood, urine dipstick, and pH by paper methods and supervision of residents, fellows, and others in training.
- Nephrology Core Privileges: Privileges to evaluate including performance of H&P, diagnose, consult, and treat adult patients presenting with illnesses, injuries, and disorders of the kidneys. These privileges include, but are not limited to, placement of temporary vascular access for hemodialysis; management of acute and chronic hemodialysis; placement of (temporary and permanent) catheter for peritoneal dialysis; management of peritoneal dialysis; continuous renal replacement therapy; initiation and supervision of continuous ultrafiltration/dialysis; and supervision of residents, fellows, and others in training.
- Central venous catheter insertion for access
- Percutaneous needle biopsy of the kidney
- Adult Moderate Sedation—Within CSC only

**Elizabeth B. McBride, MD, Active Staff**

**Department of Pediatrics/Neonatology NICU hospitalist**

- Pediatric Major Care Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult and provide care for infants, children and adolescents with complex problems or severe illnesses, including those that are potentially life-threatening. These privileges also include care of patients via telemedicine. These privileges include, but are not limited to, lumbar puncture; peripheral arterial puncture; peripheral venous puncture; neonatal circumcision; intubation; suprapubic bladder tap in the care of newborn infants greater than 2000 grams; and performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and pH by paper methods; and supervision of residents, fellows and others in training.

{Provision of attending or consultative inpatient services in the last 2 years.

**Jie C. Nguyen, MD, Active Staff**

**Department of Radiology/Pediatric Imaging**

- Radiology Core Privileges: Performance and interpretation of all radiologic tests and procedures including plain film, ultrasound, CT, MRI, nuclear medicine, fluoroscopy of the head and neck, chest, abdomen, pelvis, extremities, gastrointestinal tract, genitourinary, and musculoskeletal system in adults and children. These privileges include, but are not limited to, doppler vascular imaging, transcranial doppler, arthrograms and joint aspirations, venography of major vessels, mammography and supervision of residents, fellows and other trainees.
- Imaged guided needle, biopsy, ablation, drainage or aspiration

**Michael J. Phillips, MD, Active Staff**

**Department of Medicine/Hospitalist**

- Internal Medicine/Major Care Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat adult patients with medical illnesses. These privileges also include care of patients via telemedicine. These privileges include, but are not limited to, lumbar puncture, thoracentesis, paracentesis, arterial line insertion, diagnostic or therapeutic joint aspiration/injection, endometrial biopsy, endocervical polyp removal/biopsy, intrauterine device (IUD) insertion, punch biopsy of the skin, percutaneous needle biopsy of a breast mass or skin lesion, soft tissue injection, liquid nitrogen cryosurgery of the skin or other appropriate lesion, and perform waived laboratory testing not requiring an instrument; including but not limited to fecal occult blood, urine dipstick, and pH by paper methods and supervision of residents, fellows, and others in training.
- Central venous catheter insertion for access

**Joseph R. Scalea, MD, Active Staff**

**Department of Surgery/Fellow Transplant Surgery**

- General Surgery Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat patients presenting with disorders, illnesses or injuries of the alimentary tract, the abdomen and its contents, breast, skin, soft tissue, head and neck, endocrine system and minor extremity surgery. These privileges include, but are not limited to, laparoscopic surgery, upper gastrointestinal endoscopy, colonoscopy, insertion and management of arterial catheter, insertion and management of chest tubes, insertion and management of central venous catheters, lumbar puncture, pericardiocentesis, tracheostomy, paracentesis, management of trauma, and complete care of critically ill patients with underlying surgical conditions; performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and pH by paper methods; and supervision of residents, fellows and others in training.
- Stereotactic breast biopsy
- Organ Procurement

**Melanie A. Schmitt, MD, Active Staff**

**Department of Ophthalmology/General**

- Ophthalmology Medical and Minor Surgery Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat patients presenting with illnesses, injuries, and disorders of the eye, including its related structures and visual pathways\*; and performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and pH by paper methods; and supervision of residents, fellows and others in training.
- Ophthalmology Surgical Core Privileges: Privileges to perform basic surgical procedures considered a result of a residency training program including removal of radioactive plaque, corneal micropuncture and debridement, astigmatic keratotomy, cataract surgery with or without IOL placement, glaucoma filtration surgery with or without antimetabolite, combined cataract and filtering surgery, strabismus surgery on horizontal muscles, enucleation, cryotherapy, primary repair of entropion, ectropion, eyelid injury, tarsorrhaphy, blepharoplasty, lacrimal intubation and irrigation. These privileges include supervision of residents, fellows, and other persons in training.
- Special Competence Pediatric Ophthalmology and Strabismus: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat pediatric patients presenting with complicated illnesses, injuries, and disorders of the eye, including its related structures and visual pathways; and patients of all ages presenting with strabismus disorders. These privileges include, but are not limited to, cyclovertical muscle surgery on any

age; cataract surgery, trabeculotomy, goniotomy, specialized nasolacrimal procedures on patients 12 years old or less, surgery for congenital ptosis and ptosis reoperations.

**Toshio Takayama, MD, Active Staff**

**Department of Surgery/Peripheral-Vascular**

- Peripheral Vascular Surgery Core Privileges: Privileges to admit, evaluate including performance of H&P, diagnose, consult, and treat patients presenting with diseases and disorders of the arterial venous and lymphatic circulatory systems, excluding those of the heart, thoracic aorta and intracranial vessels. These privileges include, but are not limited to, infrarenal abdominal aortic surgery (including iliacs); portosystemic shunts; visceral artery thrombectomy or embolectomy; aortorenal procedures; thoracoabdominal procedures; intrarenal procedures; carotid surgery; upper extremity artery repair or bypass (including dialysis shunts); lower extremity artery repair or bypass; upper and lower extremity embolectomy; angiography, intraoperative angiography; and performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and pH by paper methods; and supervision of residents, fellows and others in training.
- Therapeutic percutaneous peripheral vascular interventions including renal, femoral and brachiocephalic
- Diagnostic percutaneous peripheral vascular interventions of the extracranial carotid
- Endovascular repair of arterial aneurysms (excluding coronary and intracranial aneurysms)

**Matthew E. Witek, MD, Active Staff**

**Department of Human Oncology**

- Radiation Oncology Core Privileges: Privileges to evaluate including performance of H&P, diagnose, consult, and treat patients of all ages, with malignant and benign tumors, as well as other conditions where radiotherapy has a role. These privileges include, but are not limited to, administration of external beam radiation therapy, brachytherapy, naked or tagged radioisotopes (including intralesional, intracavitary, intracystic, intravenous, intra-arterial or other routes of administration), radiosensitizers, radioprotectors and other therapeutic drugs required in the routine management of these patients; management and maintenance of indwelling brachytherapy catheters and other devices for delivery of brachytherapy or other forms of radiation; performing waived laboratory testing not requiring an instrument, including but not limited to fecal occult blood, urine dipstick, and pH by paper methods; and supervision of residents, fellows, and other persons in training.

**Michael A. Woods, MD, Active Staff**

**Department of Radiology/Interventional Radiology**

- Radiology Core Privileges: Performance and interpretation of all radiologic tests and procedures including plain film, ultrasound, CT, MRI, nuclear medicine, fluoroscopy of the head and neck, chest, abdomen, pelvis, extremities, gastrointestinal tract, genitourinary, and musculoskeletal system in adults and children. These privileges include, but are not limited to, doppler vascular imaging, transcranial doppler, arthrograms and joint aspirations, venography of major vessels, mammography and supervision of residents, fellows and other trainees.
- Imaged guided catheter placement.
- TIPs procedure
- Transjugular liver biopsy
- Image guided caval filter
- Therapeutic percutaneous peripheral vascular interventions including renal, femoral and brachiocephalic
- Tunneled catheter and port placement
- Image guided percutaneous biliary dilatation, drainage, ballooning, stenting or biopsy
- Image guided urological dilatation, drainage, ballooning, stenting or biopsy
- Image guided embolotherapy
- Therapeutic embolotherapy
- Diagnostic percutaneous peripheral vascular interventions of the extracranial carotid
- Image guided ablation and/or operative imaging of thoracolumbar or pelvic neoplasms
- Imaged guided needle, biopsy, ablation, drainage or aspiration
- Image guided spinal and/or paraspinal injection, aspiration, biopsy, ablation
- Image guided analysis for surgery, biopsy or treatment planning using any imaging modality

**Additional Privileges**

**Alexis M. Eastman, MD, Active Staff**

**Department of Medicine/General Internal Medicine**

- Geriatric Medicine Core Privileges: Privileges to evaluate including performance of H&P, diagnose, consult, and treat patients presenting with diseases and disorders of the elderly. These privileges include supervision of residents, fellows, and others in training.

**Focused Professional Practice Evaluation Review**

The following focused review applications have been endorsed by the UWHC Credentials Committee and are recommended to the Medical Board for approval/action:

Name	Department /Section	Staff Status
Greenberg, Caprice, MD	Surgery/General	Active Staff

Respectfully submitted,

Michele D. Klaus, CPMSM
