Orchiectomy

Orchiectomy is the removal of one or both testicles. Testicles can be removed due to cancer, pain or injury. A radical orchiectomy is removal of the entire testicle and spermatic cord. A simple orchiectomy is removal of the testicle only. If one testicle is removed you will have a groin wound on that side. If both testes are removed you will have a scrotal incision.

After Surgery
- You will have gauze dressing over the wound. Change this at least daily and if it gets wet.
- If you have a small drain in the scrotum, it will be taken out in 1-2 days.
- It is common to have scrotal bruising and swelling.
- You may develop a marble sized “knot” in your scrotum where the testicle was removed. It may or may not go away. This is a normal. If it is a reaction to the stitches it may go away after weeks or months. If it is scar tissue it will not.
- You will have pain pills for pain.

Incision Care
Wear a scrotal support for 3 days. This can help decrease swelling.

Check your wound daily for signs of infection.
- Increasing redness or warmth of wound
- Pus-like drainage
- Pain not controlled with pain pills
- A bruise that is getting worse each day
- Excess bleeding
- Excess swelling
- Temperature greater than 100.5°F by mouth for 2 readings, taken 4 hours apart

Activity
- Do nothing more strenuous than moderate walking for 7 days
- Do not lift more than 10 pounds for 7 days

Diet
- Do not eat or drink anything after midnight before surgery
- After surgery you may eat whatever you like
- Drink 8–10 glasses of fluid a day to aid healing
- Do not drink alcohol for at least 24 hours or if you are taking narcotic pain pills

Follow-Up
You will have an incision check in 7-14 days. This visit will be made for you before you go home.
Phone Number
Urology Clinic: (608) 263-4757

After hours, weekends and holidays this connects to the message center.

Ask for the urology doctor on call or the doctor on call for Dr. ______________.
Leave your name and phone number with the area code. The doctor will call you back.

Toll Free: 1-800-323-8942.
